

Nurse Aide Advanced (NAA)

CNA + PCT

250 hours

Overview:

This program prepares a graduate to work as an entry-level Nurse Aide or Patient Care Technician in a clinic, hospital, nursing home or long-term care (LTC) facility. Graduates will be able to check vital signs, and provide CPR and First Aid, assist in medical examinations, perform electrocardiograms (EKGs), phlebotomy and other basic laboratory procedures. This program is taught with a combination of lecture, practical exercises in the medical laboratory and with **real-world experience during the externship portion of training conducted off-campus. You will also be eligible for and prepared to take the exams to become a Certified Nurse Assistant (CNA).**

Graduates are prepared for the following certifications by the National Healthcareer Association (NHA)

- Certified Phlebotomy Technician (CPT)
- Certified EKG Technician (CET)
- Certified Patient Care Technician (CPCT)

Our NAA Course Curriculum is approved by NCCT, by the New York State Education Department (NYSED) and by the National Healthcareer Association (NHA).

Who Should Attend?

This course is recommended for all students considering starting nursing careers, and it is designed for those **(men and women)** seeking employment as a Nurse Aide/Assistant and Patient Care Technician (PCT). PCTs are basically CNAs who are certified to perform additional duties such as phlebotomy and EKGs in addition to those tasks performed by a CNA. They care for injured, physically and mentally ill, disabled or infirm patients in hospitals, nursing homes, assisted living facilities, physicians' offices or long-term care (LTC) facilities. They perform routine tasks under the supervision of doctors, nurses and other medical professionals in monitoring the patient's condition and providing basic patient care.

Patient Care Technician duties may include:

- Responding to patient calls and requests for assistance
- Bathing, dressing, grooming and assisting with personal hygiene
- Monitoring and recording vital signs - temperature, blood pressure, pulse, and respiration rate
- Observing, recording and reporting a patients' physical, mental, and emotional condition
- Perform Electrocardiograms (EKGs), collecting blood (phlebotomy) and other clinical task
- Moving patients, transferring patients to and from a bed or wheelchair and assisting with walking
- Setting up and operating therapeutic equipment and supplies
- Assisting doctors and nurses during examinations and treatments

What is included:

1. **ALL STUDY MATERIALS: Textbook For Nursing Aides, EKG & Phlebotomy Technician**
2. **Preparation For CNA NYS Board Exam**
3. **Preparation For NHA Certification Exams**
4. **Uniforms (2 Sets) & All Supplies**
5. **CPR Training and preparation for CPR Certification**
6. **Guaranteed Externship In Nursing Home/RHCF**
7. **LIFE TIME JOB PLACEMENT ASSISTANCE**
